## **HISTORY OF THE IOWA ATHLETIC COUNCIL**

The Iowa Athletic Council was established in 1998 following a national leadership conference designed to assist participants in working together more effectively for the benefit of students participating in interscholastic athletics. The purpose of the Iowa Athletic Council is to promote open discussion among the members to improve communication among all participating organizations for the mutual benefit of the organizations and student-athletes involved in interscholastic athletics throughout Iowa. It is felt this can be accomplished by fostering discussion about common issues. The main focus is the development of sportsmanship, citizenship and character.
